Berns Personal Gardeners are a team of experienced, educated designers and property managers. We specialize in providing flexible services to meet our customers’ individual landscape needs. Customized packages start with a basic 3 visits per year package including: spring clean up and mulch, summer trimming and weed control and fall clean up.

However, most home and business owners find the appearance of their landscape reaches it potential with our full service program starting in February or March, concluding in November or December (biweekly visits are available for weed control and perennial care). With our full service program we maximize your garden’s or landscape’s full potential!

Pruning, mulching, weed/pest control, fertilization, annual planting, all done at just the right time thanks to our knowledgeable professionals!

**Main Components of Maintenance:**

- **Health** - identifying essential problems of plants; disease (fungi or insect), lack of nutrients, environmental (weather, animals or manmade).

- **Care** - what is the proper care needed for the existing plants or new plants we may want to introduce; sun or wind exposure, water requirements, nutritional needs.

- **Aesthetics** - does the plant look good; size and growth habit, color and texture should all be considered when adding, changing or completing new installations. The overall growth habit can determine your decision to use or remove a plant.

**Just give us a call! 513.217.2042**

We will come to your property and meet with you to discuss the specifics. We will assess the current condition of any existing landscape and discuss your ideas for the future, putting together a package specifically for you.

You’ll be assigned a property manager that will direct services for you throughout the year. Developing this relationship provides for effective and reliable service whenever you need it.
